

Task(8.1)

Write a C++ program to find the largest three numbers in an array.

instructions:

- The array can be hard coded in the code, but try with different values to make sure that the algorithm works as expected before submitting.

Example:

- Original array: 7 12 9 15 19 32 56 70
- Three largest elements are: 70, 70, 32

Thank You
