

### **Task(8.2)**

Write a C++ program to find the largest and smallest elements in an array of integers.  
Prompt the user to input the array elements.

**Example:**

**Input:**

**number of elements: 5**

**array: 7 12 9 15 19**

**Output:**

**largest element = 19**

**Smallest element = 7**

# Thank You
