

Task(13.1)

Page object class

Requirements:

1. Create PageObject as a component for a composite pattern includes: addItem, removeItem and deleteItem Note: PageObject is a base class not an abstract class.
2. Inherit Page from PageObject.
3. Create Composite class Copy (combine inheritance and composition) contains list of PageObject also inherits from PageObject.
4. please create a complete class diagram (and be able to present it) use tools such as UMLet or draw.io

Thank You
