

Task(6.3)

Write a program in C++ to check whether a number is prime or not.

A prime number is a whole number greater than 1 that cannot be exactly divided by any whole number other than itself and 1 (e.g. 2, 3, 5, 7, 11,).

Sample Output:

Input a number to check prime or not: 13

The entered number is a prime number.

Thank You
