Task(8.3)

Problem Statement:

1. **Declare an integer variable and initialize it with a value.**
2. **Declare a raw pointer that points to the integer variable.**
3. **Print the size of the pointer itself.**
4. **Print the size of the integer variable.**
5. **Use the pointer to modify the value of the integer variable.**
6. **Print the value of the integer variable both through direct access and through the pointer.**

Thank You
